

17/3/2015

Dear Certifier / Engineer

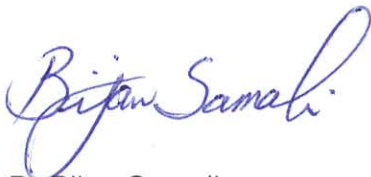

On 9 of February 2015 you received an email and an accompanying letter from me regarding some concerns I had with LOGICWALL proprietary system (originally written on 19 of December 2014). This letter referred to the website document below. I will refer to this as the "Dincel document". (<http://www.dincelandassociates.com/documents/AFS%20Logic%20Wall%20Structural%20Engineering%20Assessment%20-%20August%202014.pdf>)

Following the distribution of that letter, I had the opportunity to meet with CSR representatives over two long meetings where my concerns were discussed. Following those meetings, CSR representatives prepared the attached document as a summary response to my concerns. I am satisfied with the responses I have received.

Based on those discussions and responses, I am now of the opinion that the ASF Walling System, installed and maintained in accordance with the AFS Designer Manual, does not suffer from any of the shortcomings raised in the Dincel document.

If you require further clarification or wish to discuss this, I am quite happy to be contacted directly. My contact details are given below.

Yours sincerely,

Dr Bijan Samali
